## 1 SCOPE

This document describes key hardware aspects of the Laird Connectivity Sterling™ LWB5+ series wireless modules providing either SDIO or USB2.0 interface for WLAN connection and UART/PCM, USB2.0/PCM for Bluetooth® connection. This document is intended to assist device manufacturers and related parties with the integration of this radio into their host devices. Data in this document is drawn from several sources and includes information found in the Cypress CYW4373EUBGT data sheet issued in July 2020 along with other documents provided from Cypress.

**Note:** The information in this document is subject to change. Please contact Laird Connectivity to obtain the most recent version of this document.

## 2 INTRODUCTION

### 2.1 General Description

The LWB5+ series wireless module is an integrated, small form factor 1x1 SISO 802.11 a/b/g/n/ac WLAN plus Bluetooth® 5.0 dual mode module that is optimized for low-power mobile devices. The integration of all WLAN and Bluetooth functionality in a single package supports low cost and simple implementation along with flexibility for platform-specific customization.

This device is pre-calibrated and integrates the complete transmit/receive RF paths including diplexer, switches, reference crystal oscillator, and power management units (PMU). The integrated ceramic chip antenna, MHF4 RF connector, and RF trace pad are selectable from different variants.

The LWB5+ series device supports IEEE 802.11ac 1x1 SISO with data rates up to MCS9 (433.3 Mbps). An internal Wi-Fi and Bluetooth coexistence scheme provides optimized connectivity while Wi-Fi and Bluetooth are working simultaneously. The device's low power consumption radio architecture and power management unit (PMU) proprietary power save technologies allow for extended battery life.

In addition, its dual 802.11ac and Bluetooth radio includes full digital MAC and baseband engines that handle all 802.11 CCK/OFDM® 2.4/5 GHz and Bluetooth 5.0 (Basic Rate, Enhanced Data Rate, and Bluetooth Low Energy) baseband and protocol processing.

The LWB5+ series wireless modules include three product SKUs which have different RF path and antenna types. Please contact Laird Connectivity Sales/FAE for further information. Ordering information is listed in [Table 1](#).

**Table 1: Product ordering information**

| Part Number  | Description  |
|--------------|--|
| 453-00045R   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 - Integrated antenna (tape and reel)     |
| 453-00046R   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – MHF4 (tape and reel)                   |
| 453-00047R   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – Trace pin (tape and reel)              |
| 453-00045C   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – Integrated antenna (cut tape)          |
| 453-00046C   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – MHF4 (cut tape)                        |
| 453-00047C   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – Trace pin (cut tape)                   |
| 453-00045-K1 | Development kit for 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 - Integrated antenna |
| 453-00046-K1 | Development kit for 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – MHF4               |

### 3 LWB5+ SERIES FEATURES SUMMARY

The Laird Connectivity LWB5+ series device features are described in [Table 2](#).

**Table 2: LWB5+ series wireless module features**

| Feature  | Description   |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
|--|---|---|-----------|------------------------|-------|-----|-----|-----|---------|-----|------|------|-----------|-----|------|------|-----------|
| <b>Radio Front End</b>   | <ul style="list-style-type: none"> <li>▪ Integrates the complete transmit/receive RF paths including diplexer, switches, reference crystal oscillator, and power manage unit (PMU)</li> <li>▪ Supports 20/40/80 MHz channel bandwidth</li> <li>▪ WLAN/Bluetooth share one antenna</li> </ul>  |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <p>The <i>Bluetooth®</i> word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. Any use of such marks by Laird Connectivity is under license. Other trademarks and trade names are those of their respective owners.</p>   |   |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <b>Power Management</b>  | One buck regulator, multiple LDO regulators, and a power management unit (PMU) are integrated into the CYW4373E. All regulators are programmable via the PMU. These blocks simplify power supply design for Bluetooth and WLAN functions in embedded designs.   |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <b>Pre-Calibration</b>   | RF system tested and calibrated in production   |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <b>Sleep Clock</b>   | An external sleep clock of 32.768 kHz is required.  |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <b>Host Interface</b>  | SDIO v3.0 interface that can operate in 4b or 1b mode and a USB 2.0 interface. The Bluetooth section supports USB 2.0, USB 1.1, SDIO, and a high-speed 4-wire UART interface. An on-chip USB 2.0 hub provides a shared single USB connection to both WLAN and Bluetooth target devices.   |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Strap Value<br/><b>CONFIG_HOST [2-0]</b></th> <th>WLAN</th> <th>Bluetooth/Bluetooth LE</th> <th>Notes</th> </tr> </thead> <tbody> <tr> <td>000</td> <td>USB</td> <td>USB</td> <td>USB 2.0</td> </tr> <tr> <td>101</td> <td>SDIO</td> <td>UART</td> <td>SDIO 1.8V</td> </tr> <tr> <td>100</td> <td>SDIO</td> <td>UART</td> <td>SDIO 3.3V</td> </tr> </tbody> </table> |   | Strap Value<br><b>CONFIG_HOST [2-0]</b> | WLAN      | Bluetooth/Bluetooth LE | Notes | 000 | USB | USB | USB 2.0 | 101 | SDIO | UART | SDIO 1.8V | 100 | SDIO | UART | SDIO 3.3V |

| 000  | USB   | USB                                     | USB 2.0   |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| 101  | SDIO  | UART                                    | SDIO 1.8V |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| 100  | SDIO  | UART                                    | SDIO 3.3V |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <b>Advanced WLAN</b>   | <ul style="list-style-type: none"> <li>▪ IEEE 802.11ac compliant</li> <li>▪ Support for MCS8 VHT20 in 20 MHz channels for up to 86.7 Mbps data</li> <li>▪ Single-stream spatial multiplexing up to 433.3 Mbps data rate</li> <li>▪ Supports 20, 40, and 80 MHz channels with optional SGI (256 QAM modulation)</li> <li>▪ Full IEEE 802.11a/b/g/n legacy compatibility with enhanced performance</li> <li>▪ TX and RX low-density parity check (LDPC) support for improved range and power efficiency</li> <li>▪ On-chip power amplifiers and low-noise amplifiers for both bands</li> <li>▪ Support wide variety of WLAN encryption: WEP/WPA/TKIP/WPA2 AES-CCMP</li> </ul>   |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |
| <b>Advanced Bluetooth</b>  | <ul style="list-style-type: none"> <li>▪ Qualified for Bluetooth Core Specification 5.0 with all Bluetooth 4.2 optional features           <ul style="list-style-type: none"> <li>– QDID: 158628</li> <li>– Declaration ID: D050382</li> </ul> </li> <li>▪ Bluetooth Class 1 or Class 2 transmitter operation</li> <li>▪ Support data rate: 1 Mbps (GFSK), 2 Mbps (<math>\pi/4</math>-DQPSK), 3 Mbps (8-DPSK)</li> <li>▪ Supports extended synchronous connections (eSCO) for enhanced voice quality by allowing for retransmission of dropped packets</li> <li>▪ Adaptive frequency hopping (AFH) for reducing radio frequency interference</li> <li>▪ Interface support, host controller interface (HCI) using a highspeed UART or USB interface, and PCM for audio data</li> <li>▪ Low power consumption improves battery life of IoT and embedded devices</li> <li>▪ Supports multiple simultaneous Advanced Audio Distribution Profiles (A2DP) for stereo sound</li> <li>▪ Automatic frequency detection for standard crystal and TCXO values</li> </ul> |   |           |                        |       |     |     |     |         |     |      |      |           |     |      |      |           |

## 4 SPECIFICATIONS

**Table 3: Specifications**

| Feature                                 | Description  |
|---|--|
| <b>Physical Interface</b>               | 68-pin LGA package (including 17 thermal ground pads under the package)  |
| <b>Wi-Fi Interface</b>                  | 1-bit or 4-bit Secure Digital I/O; USB 2.0   |
| <b>Bluetooth/BLE Interface</b>          | Host Controller Interface (HCl) using high speed UART, USB 2.0   |
| <b>Main Chip</b>                        | Cypress CYW4373EUBGT   |
| <b>Input Voltage Requirements</b>       | Operational: VBAT is 3.2V to 4.8V<br>** EVM/harmonics are improved with VBAT ≥ 3.6V  |
| <b>I/O Signalling Voltage</b>           | Typical DC 3.2V to 3.6V or DC 1.8 V ± 10%  |
| <b>Operating Temperature</b>            | -40° to +85°C (-40° to +185°F)   |
| <b>Operating Humidity</b>               | 10 to 90% (non-condensing)   |
| <b>Storage Temperature</b>              | -40° to +85°C (-40° to +185°F)   |
| <b>Storage Humidity</b>                 | 10 to 90% (non-condensing)   |
| <b>MSL (Moisture Sensitivity Level)</b> | 4  |
| <b>Maximum Electrostatic Discharge</b>  | Conductive 4KV; Air coupled 8KV<br>(follow EN61000-4-2)  |
| <b>Size – mm (in.)</b>                  | Length: 17 (0.67)<br>Width: 12 (0.47)<br>Thickness: 2.13 (0.08)  |
| <b>Weight – g (oz.)</b>                 | ~0.7 (~0.02)   |
| <b>Wi-Fi Media</b>                      | Direct Sequence-Spread Spectrum (DSSS)<br>Complementary Code Keying (CCK)<br>Orthogonal Frequency Divisional Multiplexing (OFDM)   |
| <b>Bluetooth Media</b>                  | Frequency Hopping Spread Spectrum (FHSS)   |
| <b>Wi-Fi Multimedia</b>                 | WMM<br>Wi-Fi Multimedia - PowerSave (WMM-PS with U-APSD)<br>WMM-Sequential Access (WMM-SA with PCF)  |
| <b>Network Architecture Types</b>       | Infrastructure (client operation)  |
| <b>Wi-Fi Standards</b>                  | IEEE 802.11a, 802.11b, 802.11e, 802.11g, 802.11h, 802.11i, 802.11k*, 802.11n, 802.11r, 802.11v*, 802.11ac  |
| <b>Bluetooth Standards</b>              | Bluetooth 5.0 Core Spec  |
| <b>Wi-Fi Data Rates Supported</b>       | Support 802.11 ac/a/b/g/n 1x1 SISO.<br>802.11b (DSSS, CCK) 1, 2, 5.5, 11 Mbps<br>802.11a/g (OFDM) 6, 9, 12, 18, 24, 36, 48, 54 Mbps<br>802.11n (OFDM, HT20/HT40, MCS0-7)<br>802.11ac (OFDM, VHT20, MCS0-8; OFDM, VHT40/HT80, MCS0-9) |
| <b>Modulation Table</b>                 | BPSK, QPSK, CCK, 16-QAM, 64-QAM, and 256-QAM.  |

| Feature                                   | Description |  |               |                 |            |        |        |       |        |       |        |     |

## 5 WLAN FUNCTIONAL DESCRIPTION

### 5.1 Overview

The LWB5+ series wireless module is designed based on the Cypress CYW4373EUBGT 802.11ac/a/b/g/n chipset. It is optimized for high speed, reliability, and low-power embedded applications. It is integrated with dual-band WLAN (2.4/5 GHz) and Bluetooth 5.0. Its functionality includes the following:

- Improved throughput on the link due to frame aggregation, RIFS (reduced inter-frame spacing), and half guard intervals.
- Support for LDPC (Low Density Parity Check) codes.
- Improved 11n performance due to features such as 11n frame aggregation (TX A-MPDU) and low-overhead host-assisted buffering (RX A-MPDU). These techniques can improve performance and efficiency of applications involving large bulk data transfers such as file transfers or high-resolution video streaming.
- IEEE 802.11ac, 1x1 SISO with data rate up to MCS9 (433.3 Mbps).

Additional functionality is listed in [Table 4](#).

**Table 4: WLAN functions**

## 6 BLUETOOTH FUNCTIONAL DESCRIPTION

The LWB5+ series wireless module includes a fully integrated Bluetooth baseband/radio. Several features and functions are listed in [Table 5](#).

**Table 5: Bluetooth functions**

| Feature  | Description   |
|--|---|
| <b>Bluetooth Interface</b>                           | <ul style="list-style-type: none"> <li>▪ Voice interface:           <ul style="list-style-type: none"> <li>– Hardware support for continual PCM data transmission/reception without processor overhead.</li> <li>– Standard PCM clock rates from 64 kHz to 2.048 MHz with multi-slot handshake and synchronization.</li> <li>– A-law, U-law, and linear voice PCM encoding/decoding.</li> </ul> </li> <li>▪ High-Speed UART interface</li> <li>▪ USB 2.0</li> </ul>   |
| <b>Bluetooth Core functionality</b>                  | <ul style="list-style-type: none"> <li>▪ Bluetooth 5.0</li> <li>▪ Bluetooth Class 2/Bluetooth class 1</li> <li>▪ WLAN and Bluetooth share same LNA and antenna</li> <li>▪ Digital audio interfaces with TDM interface for voice application</li> <li>▪ Baseband and radio BDR and EDR package type: 1 Mbps, 2 Mbps, 3 Mbps</li> <li>▪ Fully functional Bluetooth baseband: AFH, forward error correction, header error control, access code correction, CRC, encryption bit stream generation, and whitening.</li> <li>▪ Adaptive Frequency Hopping (AFH) using Packet Error Rate (PER)</li> <li>▪ Interlaced scan for faster connection setup</li> <li>▪ Simultaneous active ACL connection setup</li> <li>▪ Automatic ACL package type selection</li> <li>▪ Full master and slave piconet support</li> <li>▪ Scatter net support</li> <li>▪ SCO/eSCO links with hardware accelerated audio signal processing and hardware supported PPEC algorithm for speech quality improvement</li> <li>▪ All standard SCO/eSCO voice coding</li> <li>▪ All standard pairing, authentication, link key, and encryption operations</li> <li>▪ Encryption (AES) support</li> </ul> |
| <b>Bluetooth Low Energy (BLE) Core functionality</b> | <ul style="list-style-type: none"> <li>▪ Bluetooth 5.0 Core Spec</li> <li>▪ Bluetooth 4.2 features:           <ul style="list-style-type: none"> <li>○ LE privacy 1.2</li> <li>○ LE Secure Connection</li> <li>○ LE Data Length Extension</li> </ul> </li> <li>▪ Bluetooth 4.0 features:           <ul style="list-style-type: none"> <li>○ Advertiser, scanner, initiator, master, and slave roles support (connects to 16 links)</li> <li>○ WLAN/Bluetooth coexistence (BCA) protocol support.</li> <li>○ Shared RF with BDR/EDR</li> <li>○ Encryption (AES) support</li> <li>○ Intelligent Adaptive Frequency Hopping (AFH)</li> </ul> </li> </ul>   |

## 7 BLOCK DIAGRAM

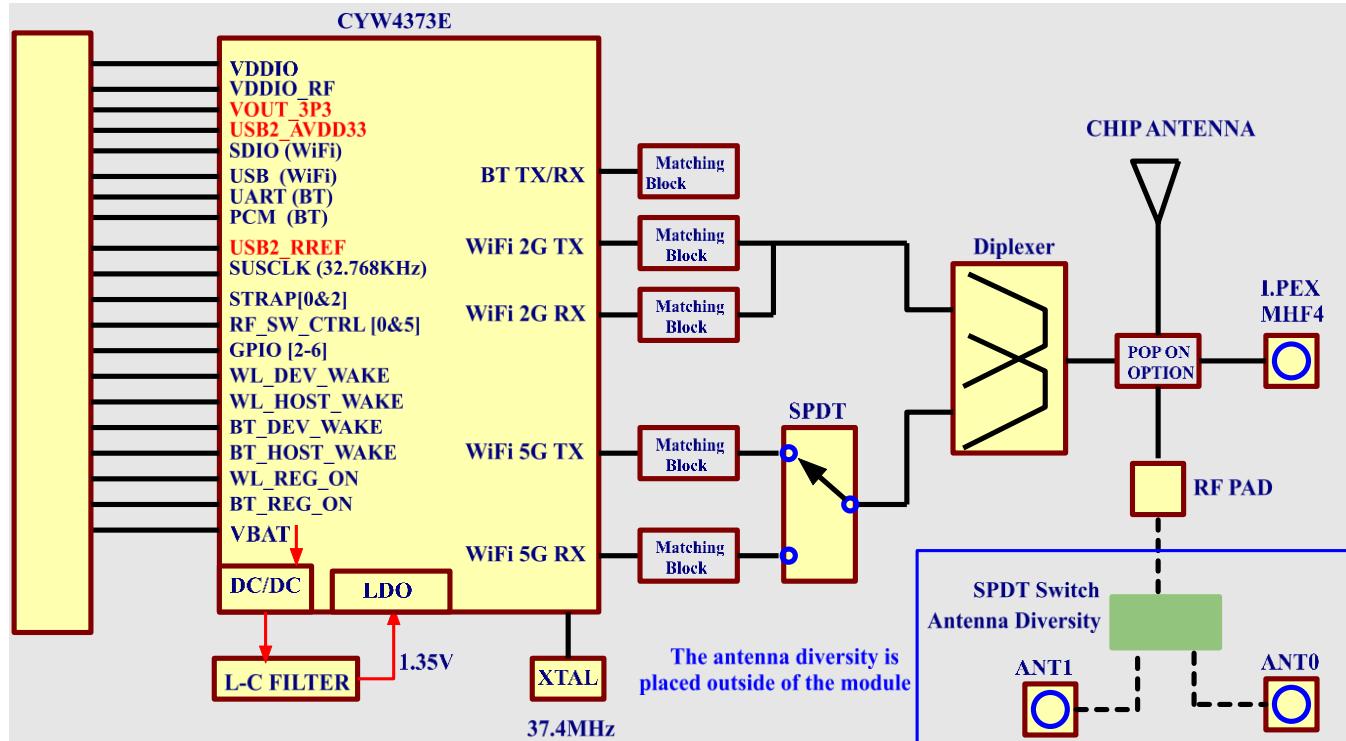

Figure 1: Block diagram

## 8 ELECTRICAL CHARACTERISTICS

### 8.1 Absolute Maximum Ratings

Table 6 summarizes the absolute maximum ratings and Table 7 lists the recommended operating conditions for the LWB5+ series wireless module. Absolute maximum ratings are those values beyond which damage to the device can occur. Functional operation under these conditions, or at any other condition beyond those indicated in the operational sections of this document, is not recommended.

**Note:** Maximum rating for signals follows the supply domain of the signals.

Table 6: Absolute maximum ratings

| Symbol (Domain) | Parameter   | Max Rating | Unit |
|-----------------|---|------------|------|
| VDDIO           | WLAN host SDIO interface I/O supply (for 1.8V system) | 2.2        | V    |
|                 | (for 3.3V system)                                     | 4.0        |      |
| VDDIO_RF        | I/O configuration power supply (for 3.3V system)      | 4.0        | V    |
| VBAT            | External DC power supply                              | 5.0        | V    |
| Storage         | Storage temperature                                   | -40 to +85 | °C   |
| Antenna         | Maximum RF input (reference to 50-Ω input)            | +10        | dBm  |
| ESD             | Electrostatic discharge tolerance                     | 2000       | V    |

## 8.2 Recommended Operating Conditions

**Table 7: Recommended operating conditions**

| Symbol (Domain) | Parameter                                    | Min       | Typ     | Max       | Unit |
|-----------------|--|-----------|---------|-----------|------|
| VDDIO           | WLAN and Bluetooth host interface I/O supply | 1.62/2.97 | 1.8/3.3 | 1.98/3.63 | V    |
| VDDIO_RF        | I/O supply for the RF switch control pads    | 3.2       | 3.3     | 3.63      | V    |
| VBAT            | External DC power supply                     | 3.2       | 3.30    | 3.63      | V    |
|                 | EVM/harmonics are improved                   | 3.6       | —       | 4.8       | V    |
| T-ambient       | Ambient temperature                          | -40       | 25      | 85        | °C   |

## 8.3 DC Electrical Characteristics

[Table 8](#) and [Table 9](#) list the general DC electrical characteristics over recommended operating conditions (unless otherwise specified).

**Table 8: General DC electrical characteristics (For 1.8V operation VDDIO)**

| Symbol | Parameter                | Conditions | Min  | Typ | Max  | Unit |
|--------|--------------------------|------------|------|-----|------|------|
| VIH    | High Level Input Voltage | —          | 1.17 | —   | —    | V    |
| VIL    | Low Level Input Voltage  | —          | —    | —   | 0.63 | V    |
| VOH    | Output high Voltage      | —          | 1.35 | —   | —    | V    |
| VOL    | Output low Voltage       | —          | —    | —   | 0.45 | V    |

**Table 9: General DC electrical characteristics (For 3.3V operation VIO\_SD; VIO)**

| Symbol | Parameter                | Conditions | Min | Typ | Max | Unit |
|--------|--------------------------|------------|-----|-----|-----|------|
| VIH    | High Level Input Voltage | —          | 2.0 | —   | —   | V    |
| VIL    | Low Level Input Voltage  | —          | —   | —   | 0.8 | V    |
| VOH    | Output high Voltage      | —          | 2.9 | —   | —   | V    |
| VOL    | Output low Voltage       | —          | —   | —   | 0.4 | V    |

## 8.4 WLAN Radio Receiver Characteristics

[Table 10](#) and [Table 11](#) summarize the LWB5+ series wireless module receiver characteristics.

**Table 10: WLAN receiver characteristics for 2.4 GHz single chain operation**

| Symbol | Parameter                     | Conditions            | Min   | Typ | Max   | Unit |
|--------|-------------------------------|-----------------------|-------|-----|-------|------|
| Frx    | Receive input frequency range | —                     | 2.412 | —   | 2.484 | GHz  |
| Srf    | Sensitivity                   | See Note <sup>1</sup> | —     | -95 | —     | dBm  |
|        | CCK, 1 Mbps                   |                       | —     | -90 | —     |      |
|        | CCK, 11 Mbps                  |                       | —     | -92 | —     |      |
|        | OFDM, 6 Mbps                  |                       | —     | -75 | —     |      |

**Table 19: BLE RF Specifications (3.3V)**

| Parameter                   | Conditions             | Min  | Typ  | Max  | Unit |
|-----------------------------|------------------------|------|------|------|------|
| Frequency range             | —                      | 2402 | —    | 2480 | MHz  |
| Rx sensitivity <sup>3</sup> | GFSK, 30.8% PER, 1Mbps | —    | -94  | —    | dBm  |
| Tx power <sup>4</sup>       | —                      | —    | —    | 7    | dBm  |
| Δf1 average                 | —                      | 225  | 255  | 275  | KHz  |
| Δf2 maximum <sup>5</sup>    | —                      | 185  | 220  | —    | KHz  |
| Δf2 avg ratio<br>Δf1 avg    | —                      | 0.8  | 0.95 | —    | —    |

**Notes**

- [3] Dirty Tx is Off.
- [4] The Bluetooth LE TX power cannot exceed 10 dBm EIRP specification limit. The front-end losses and antenna gain/loss must be factored in so as not to exceed the limit.
- [5] At least 99.9% of all Δf2 maximum frequency values recorded over 10 packets must be greater than 185 KHz.

## 10 HOST INTERFACE SPECIFICATIONS

### 10.1 SDIO Specifications

The LWB5+ series wireless module SDIO host interface pins are powered from the VIO\_SD voltage supply. The SDIO electrical specifications are identical for the 1-bit SDIO and 4-bit SDIO modes.

#### 10.1.1 Default Speed, High-speed Modes

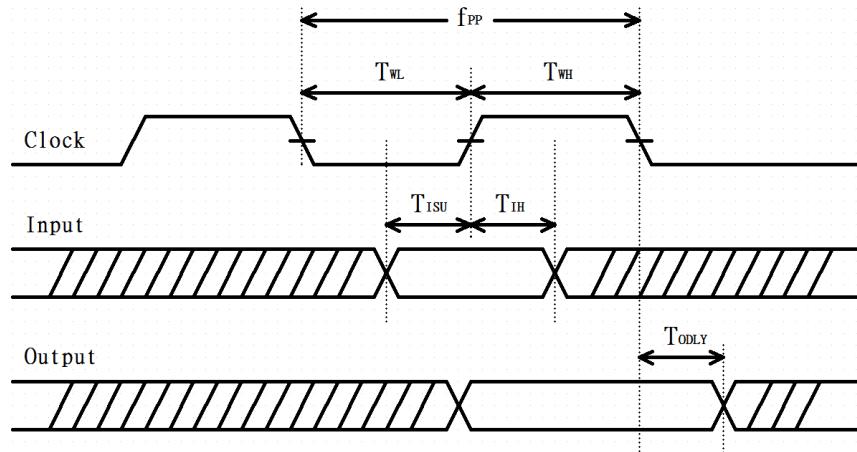

Figure 2: SDIO protocol timing diagram--- default mode (3.3V)

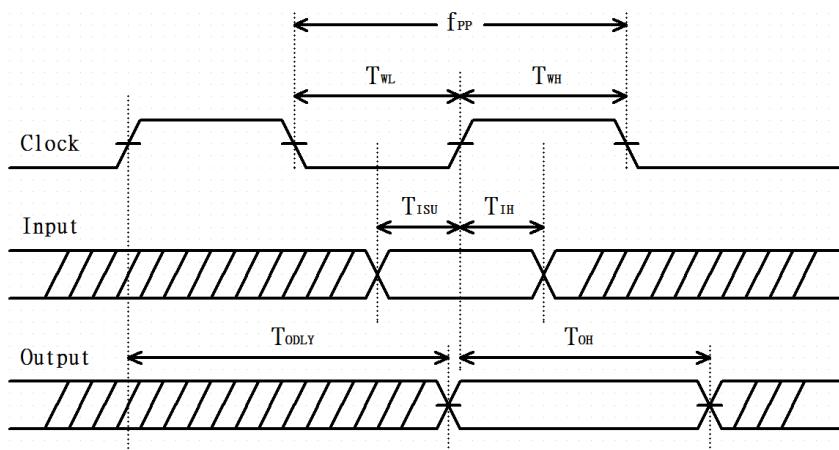

Figure 3: SDIO protocol timing diagram--- High-Speed mode (3.3V)

---

**Note:** Over full range of values specified in the Recommended Operating Conditions unless otherwise specified.

---

Table 20: SDIO timing requirements

| Symbol | Parameter       | Condition     | Min. | Typ. | Max. | Unit |
|--------|-----------------|---------------|------|------|------|------|
| fPP    | Clock Frequency | Default Speed | 0    | -    | 25   | MHz  |
|        |                 | High-Speed    | 0    | -    | 50   |      |
| TWL    | Clock low time  | Default Speed | 10   | -    | -    | ns   |
|        |                 | High-Speed    | 7    | -    | -    |      |

| Symbol | Parameter   | Condition     | Min. | Typ. | Max. | Unit |
|--------|---|---------------|------|------|------|------|
| TWH    | Clock high time                                     | Default Speed | 10   | -    | -    | ns   |
|        |   | High-Speed    | 7    | -    | -    |      |

## 12 HOST CONFIGURATION OPTIONS

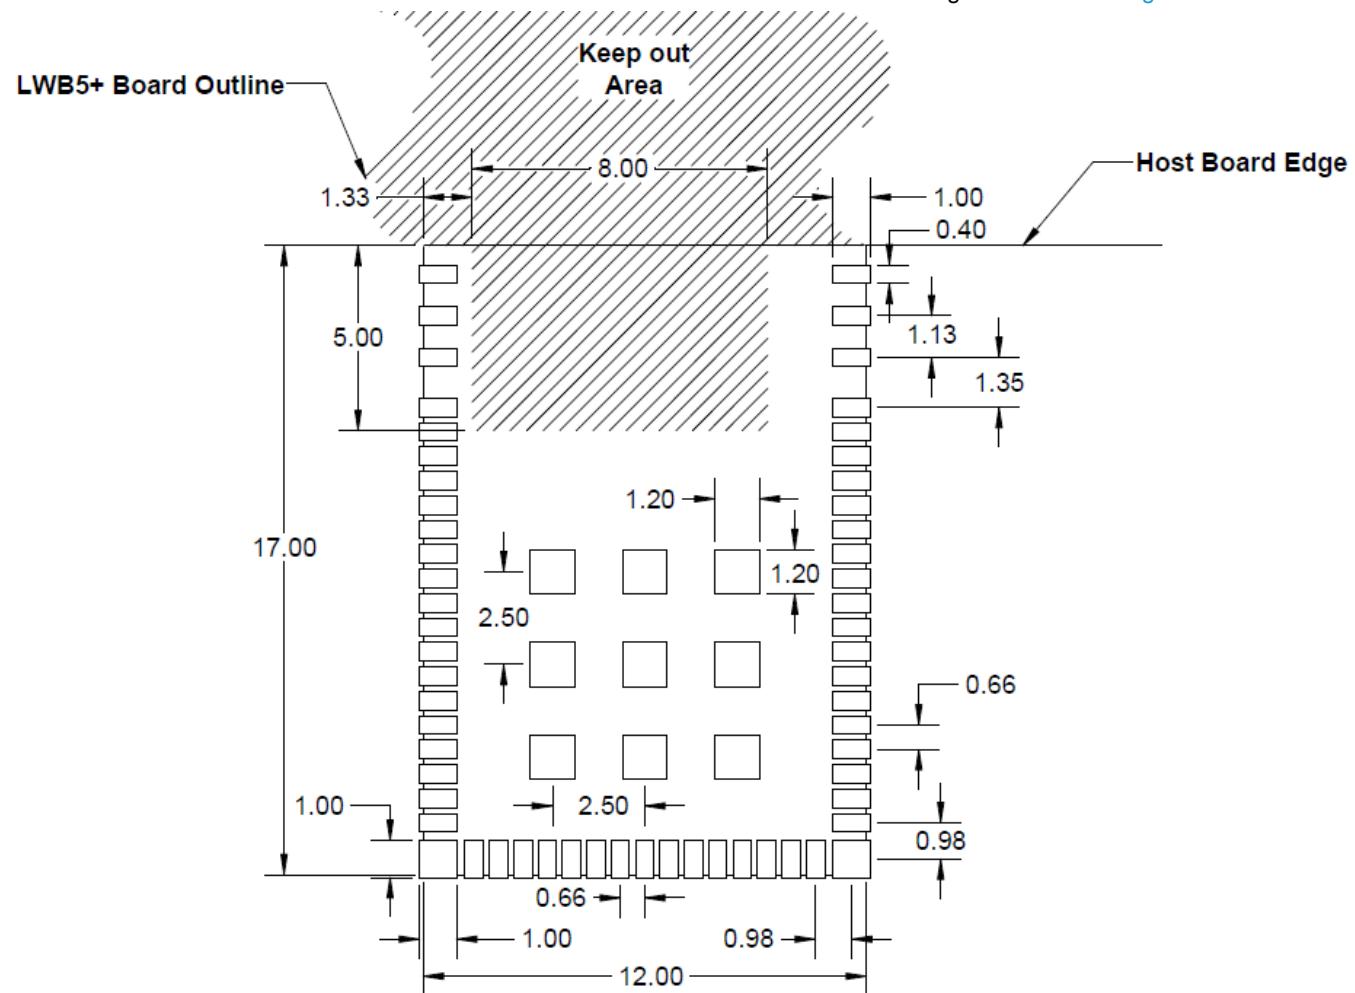

LWB5+ series wireless module support various host configurations for WLAN and Bluetooth. Its detail configurations are shown in [Table 30](#).

**Table 30: Wi-Fi host interface configuration table**

| Strap Value<br>CONFIG_HOST [2-0] | WLAN | Bluetooth/BLE | Notes   |
|----------------------------------|------|---------------|---|
| 000                              | USB  | USB           | USB2.0  |
| 101                              | SDIO | UART          | SDIO 1.8V (Supports DS/HS and SDR speed modes)  |
| 100                              | SDIO | UART          | SDIO 3.3V (Supports DS and HS speed modes only) |

## 13 MECHANICAL SPECIFICATIONS

Module dimensions of LWB5+ series wireless module is 17 x 12 x 2.1 mm. Detail drawings are shown in [Figure 10](#).

**Figure 10: Mechanical drawing - LWB5+ series wireless module**

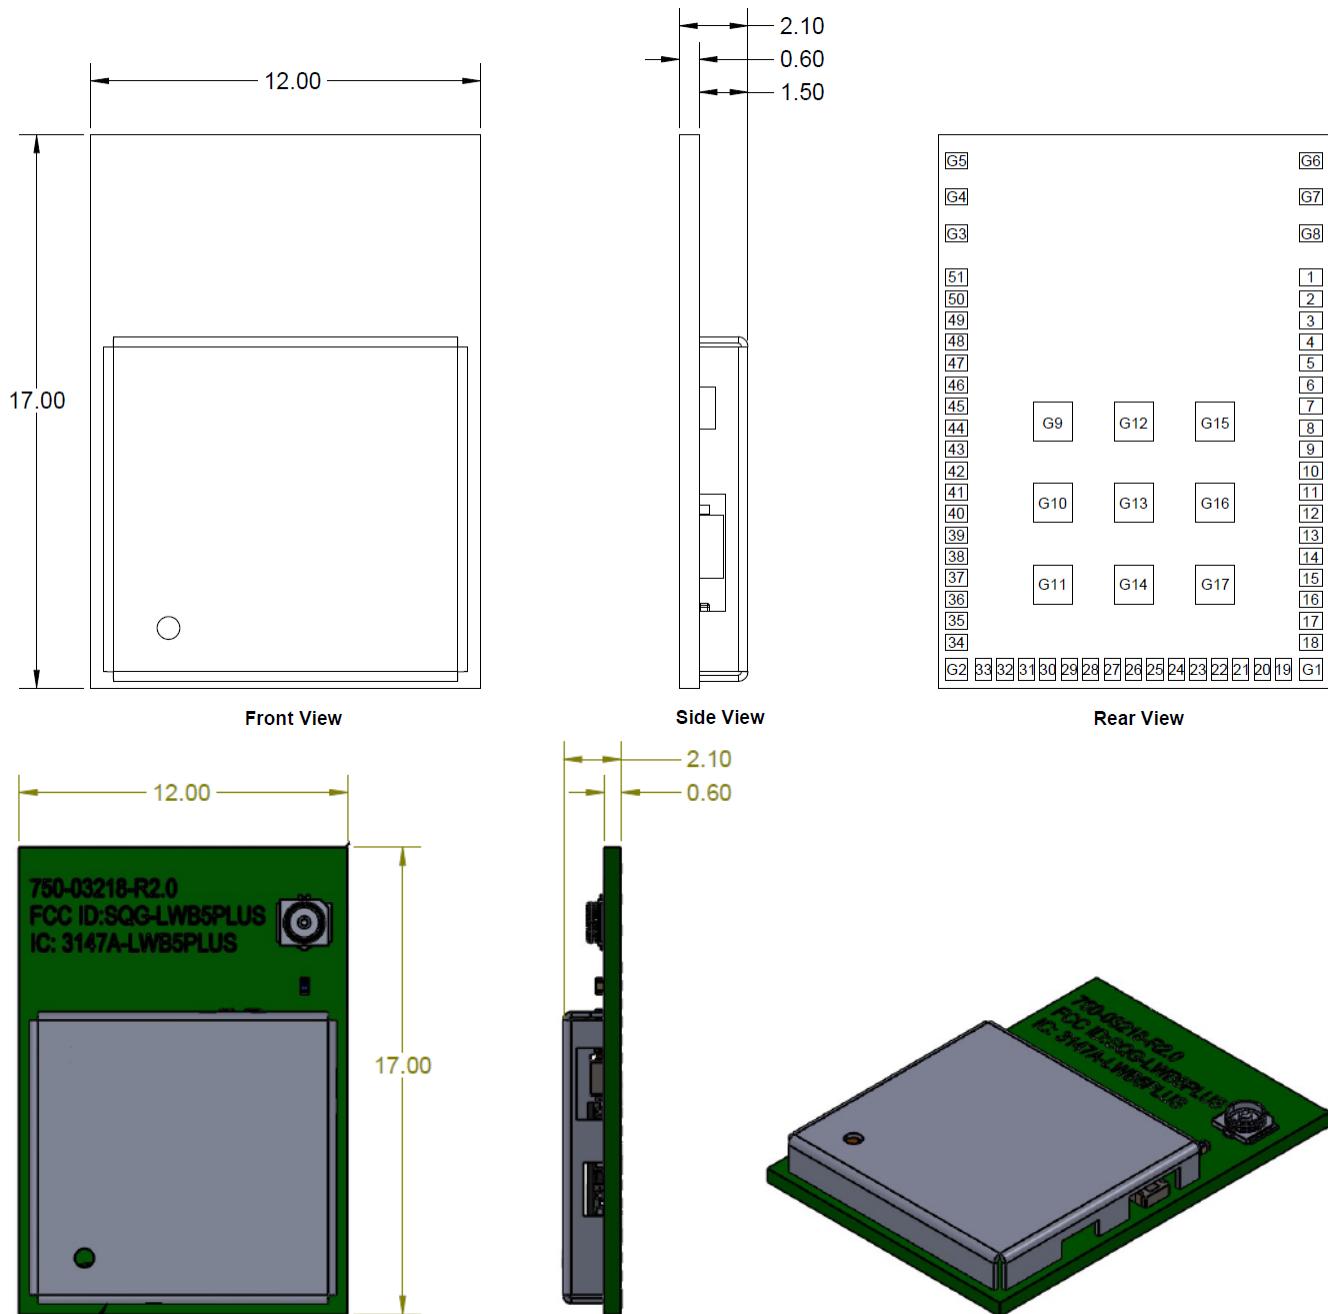

Figure 11: Module dimension of LWB5+ series wireless module – Top View

**Note:** The Wi-Fi MAC address is located on the product label.  
The last digit of Wi-Fi MAC address is assigned to either 0, 2, 4, 6, 8, A, C, E.  
The Bluetooth MAC address is the Wi-Fi MAC address plus 1.

## 14 RF LAYOUT DESIGN GUIDELINES

The following is a list of RF layout design guidelines and recommendation when installing a Laird Connectivity radio into your device.

- Do not run antenna cables directly above or directly below the radio.
- Do not place any parts or run any high-speed digital lines below the radio.
- If there are other radios or transmitters located on the device (such as a Bluetooth radio), place the devices as far apart from each other as possible. Also, make sure there is at least 25 dB isolation between these two antennas.
- Ensure that there is the maximum allowable spacing separating the antenna connectors on the Laird Connectivity radio from the antenna. In addition, do not place antennas directly above or directly below the radio.
- Laird Connectivity recommends the use of a double-shielded cable for the connection between the radio and the antenna elements.
- Be sure to put a 10uF capacitor on EACH 3.3V power pin. Also, place that capacitor to the pin as close as possible to make sure the internal PMU working correctly.
- Use proper electro-static-discharge (ESD) procedures when installing the Laird Connectivity radio module. To avoid negatively impacting Tx power and receiver sensitivity, do not cover the antennas with metallic objects or components.

## 15 APPLICATION NOTE FOR SURFACE MOUNT MODULES

### 15.1 Introduction

Laird Connectivity's surface mount modules are designed to conform to all major manufacturing guidelines. This application note is intended to provide additional guidance beyond the information that is presented in the user manual. This application note is considered a living document and will be updated as new information is presented.

The modules are designed to meet the needs of several commercial and industrial applications. They are easy to manufacture and conform to current automated manufacturing processes.

### 15.2 Shipping

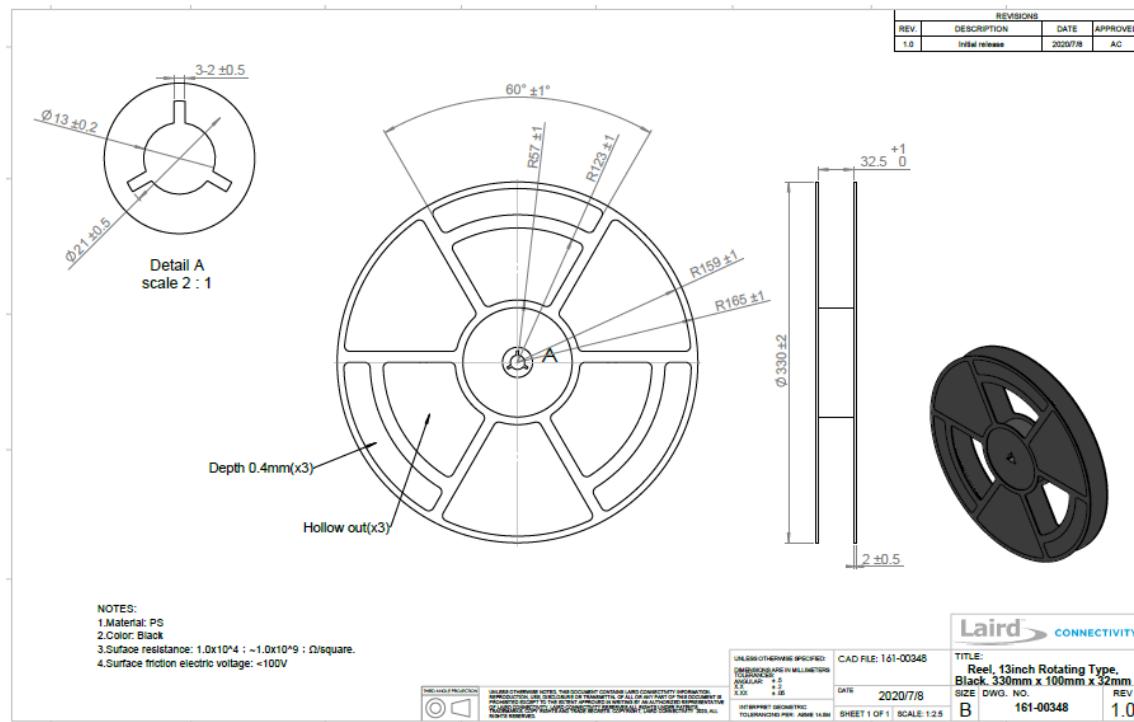

Figure 12: Reel specifications

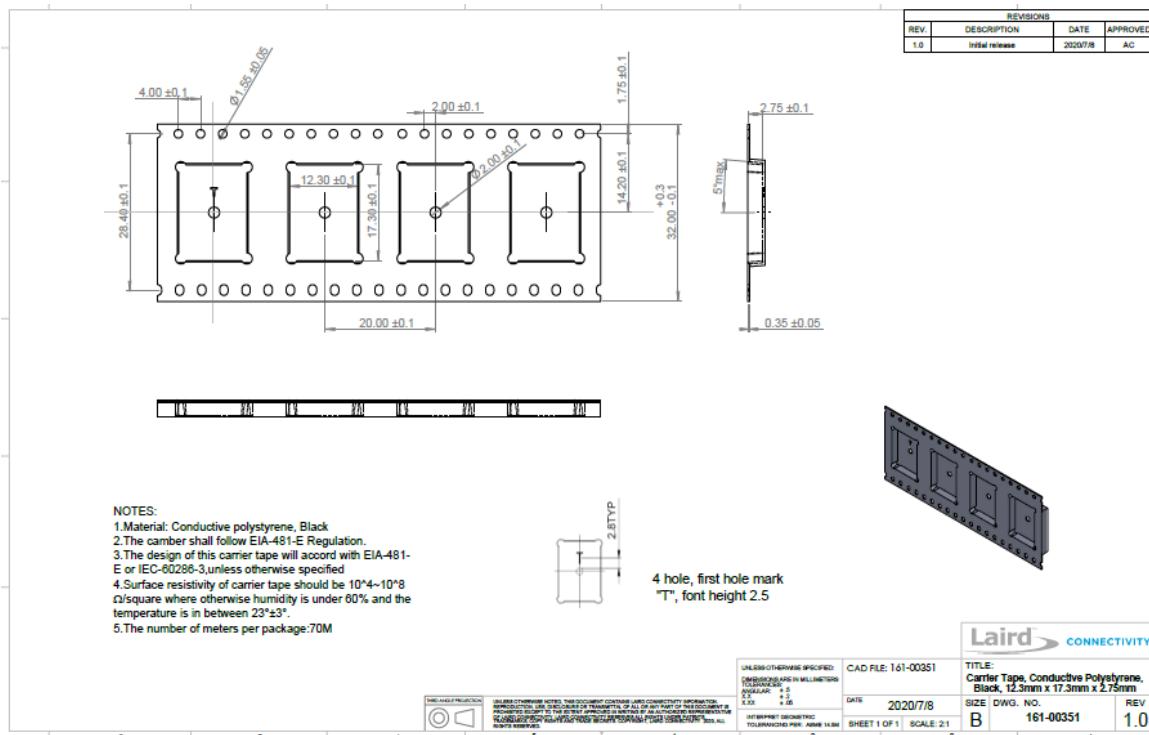

Figure 13: Tape specifications, 161-00351

There are 1,000 Sterling LWB5+ modules taped in a reel (and packaged in a pizza box) and two boxes per carton (2000 modules per carton). Reel, boxes, and carton are labeled with the appropriate labels. See [Error! Reference source not found.](#) for more information.

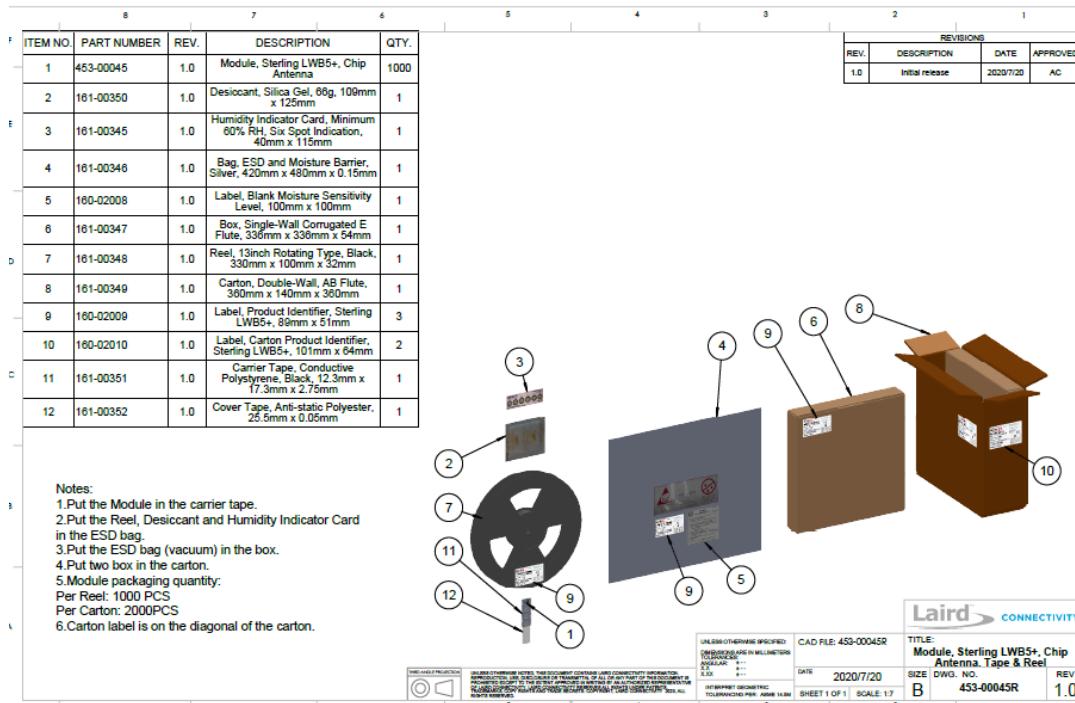

Figure 14: Sterling LWB5+ packaging process

## 15.3 Labelling

The following labels are located on the antistatic bag.

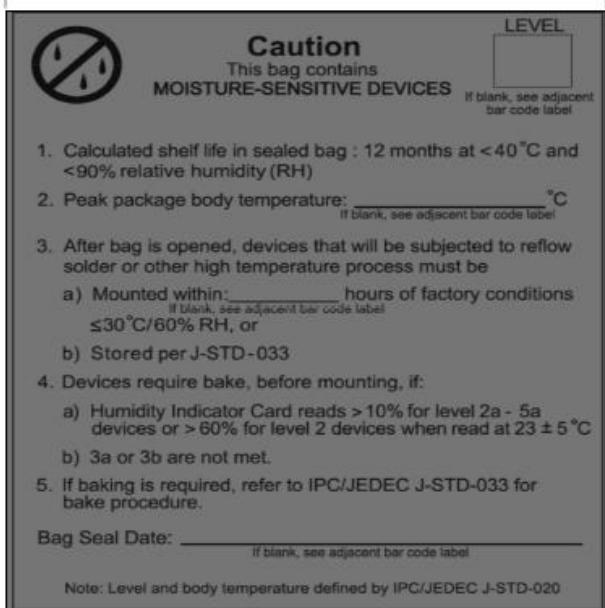

Figure 15: Anti-static bag label – 1

Figure 16: Anti-static bag label – 2

The following label is located on the pizza box.

Figure 17: Box label

The following package label is located on adjacent sides of the master carton.

Figure 18: Master carton package label

## 15.4 Required Storage Conditions

### 15.4.1 Prior to Opening the Dry Packing

The following are required storage conditions **prior to opening the dry packing**:

- Normal temperature: 5~40°C
- Normal humidity: 80% (Relative humidity) or less
- Storage period: One year or less

**Note:** Humidity means relative humidity.

### 15.4.2 After Opening the Dry Packing

The following are required storage conditions **after opening the dry packing** (to prevent moisture absorption):

- Storage conditions for one-time soldering:
  - Temperature: 5-25°C
  - Humidity: 60% or less
  - Period: 72 hours or less after opening
- Storage conditions for two-time soldering
  - Storage conditions following opening and prior to performing the 1<sup>st</sup> reflow:
    - Temperature: 5-25°C
    - Humidity: 60% or less
    - Period: A hours or less after opening
  - Storage conditions following completion of the 1<sup>st</sup> reflow and prior to performing the 2<sup>nd</sup> reflow
    - Temperature: 5-25°C
    - Humidity: 60% or less
    - Period: B hours or less after completion of the 1<sup>st</sup> reflow

**Note:** Should keep A+B within 72 hours.

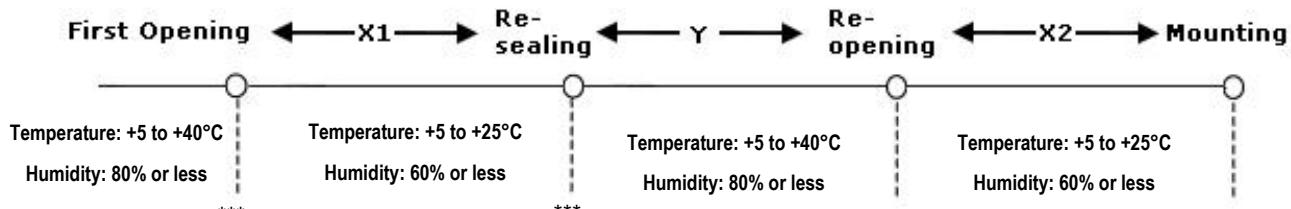

### 15.4.3 Temporary Storage Requirements after Opening

The following are temporary storage requirements after opening:

- Only re-store the devices *once* prior to soldering.
- Use a dry box or place desiccant (with a blue humidity indicator) with the devices and perform dry packing again using vacuumed heat-sealing.

The following indicate the required storage period, temperature, and humidity for this temporary storage:

- Storage temperature and humidity:

\*\*\* - External atmosphere temperature and humidity of the dry packing

- Storage period:
  - X1+X2 – Refer to [After Opening the Dry Packing](#) storage requirements. Keep is X1+X2 within 72 hours.
  - Y – Keep within two weeks or less.

## 15.5 Baking Conditions

Baking conditions and processes for the module follow the J-STD-033 standard which includes the following:

- The calculated shelf life in a sealed bag is 12 months at <40°C and <80% relative humidity.
- Once the packaging is opened, the SiP must be mounted (per MSL4/Moisture Sensitivity Level 4) within 72 hours at <30°C and <60% relative humidity.
- If the SiP is not mounted within 72 hours or if, when the dry pack is opened, the humidity indicator card displays >10% humidity, then the product must be baked for 48 hours at 125 °C ( $\pm 5$  °C).

## 15.6 Surface Mount Conditions

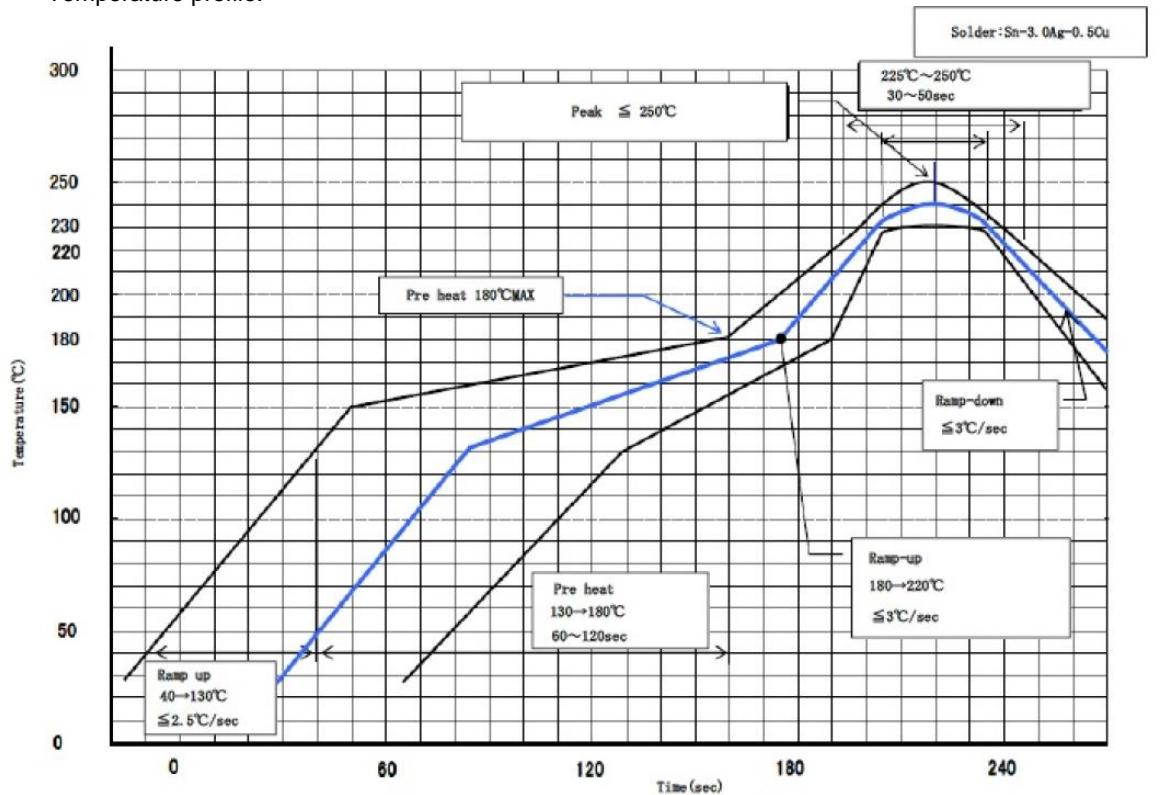

The following soldering conditions are recommended to ensure device quality.

### 15.6.1 Soldering

**Note:** When soldering, the stencil thickness should be  $\geq 0.1$  mm.

Convection reflow or IR/Convection reflow (one-time soldering or two-time soldering in air or nitrogen environment)

- Measuring point – IC package surface
- Temperature profile:

**Figure 19: Temperature profile**

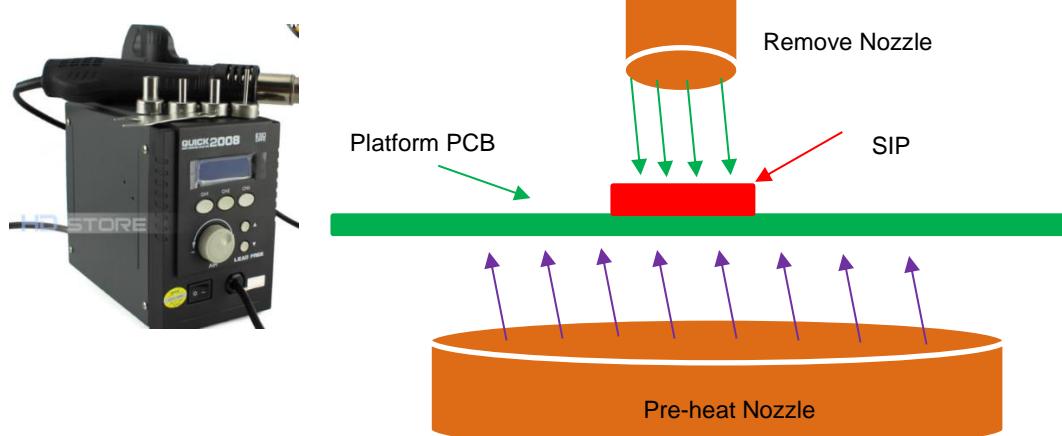

- Ramp-up: 40-130°C. Less than 2.5°C/sec
- Pre heat: 130-180°C 60-120 sec, 180°C MAX
- Ramp-up: 180-220°C. Less than 3°C/sec
- Peak Temperature: MAX 250°C
  - 225°C ~ 250°C, 30 ~ 50 sec
- Ramp-down: Less than 3°C/sec

## 15.6.2 Cautions When Removing the SIP from the Platform for RMA

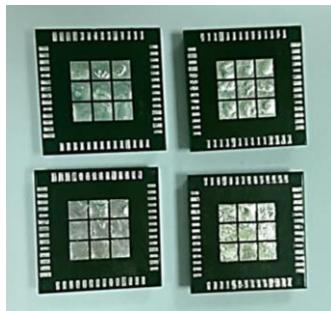

- Bake the platform before removing the SIP from the platform. Reference baking conditions.
- Remove the SIP by using a hot air gun. This process should be carried out by a skilled technician.

Suggestion conditions:

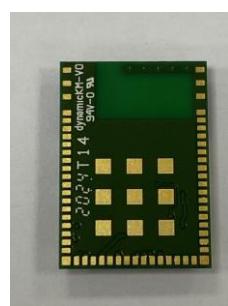

- One-side component platform:
  - Set the hot plate at 280 °C.
  - Put the platform on the hot plate for 8~10 seconds.
  - Remove the SIP from platform.
- Two-side components platform:
  - Use two hot air guns
  - On the bottom side, use a pre-heated nozzle (temperature setting of 200~250 °C) at a suitable distance from the platform PCB.
  - On the top side, apply a remove nozzle (temperature setting of 330 °C). Heat the SIP until it can be removed from platform PCB.

- Remove the residue solder under the bottom side of SIP. (Note: Alternate module pictured as an example)

(Not accepted for RMA)

(Accepted for RMA analysis)

**Example SIP with residue solder on the bottom**

**Sterling LWB5+ module without residue solder on the bottom**

- Remove and clean the residue flux as needed.

## 15.6.3 Precautions for Use

- Opening/handling/removing must be done on an anti-ESD treated workbench. All workers must also have undergone anti-ESD treatment.
- The devices should be mounted within one year of the date of delivery.
- The LWB5+ modules are MSL level 4

## 16 REGULATORY

### 16.1 Regulatory IDs Summary

| Model          | US/FCC       | Canada/IC      | MIC        |
|----------------|--------------|----------------|------------|
| Sterling LWB5+ | SQG-LWB5PLUS | 3147A-LWB5PLUS | 201-200402 |

### 16.2 Certified Antennas

The Sterling LWB5+ was tested with antennas listed in the following table. The OEM can choose a different manufacturer's antenna but must make sure it is of same type and that the gain is lesser than or equal to the antenna that is approved for use\*.

**\*Note:** Japan (MIC) lists applicable antennas on its certificates, so if your antenna is not on the approved list, irrespective of whether it is comparative, it must be added to the certificate before it can be used in Japan.

| Manufacturer       | Model                      | Laird Connectivity Part Number | Type         | Connector    | Peak Gain |         |
|--------------------|----------------------------|--------------------------------|--------------|--------------|-----------|---------|
|                    |                            |                                |              |              | 2.4 GHz   | 5GHz    |
| Laird Connectivity | 2.4/5.5 GHz Dipole Antenna | 001-0009                       | Dipole       | RP-SMA       | 2dBi      | 2dBi    |
| Laird Connectivity | FlexPIFA                   | 001-0021                       | PIFA         | MHF4L        | 2.5dBi    | 3dBi    |
| Laird Connectivity | Mini NanoBlade Flex        | EMF2449A1-10MH4L               | PCB Dipole   | MHF4L        | 2.78dBi   | 3.38dBi |
| Laird Connectivity | NanoBlade                  | ENB2449A1-10MH4L               | PCB Dipole   | MHF4L        | 2dBi      | 3.9dBi  |
| ACX                | AD1608-A2455AAT/LF         | N/A                            | Chip Antenna | MHF4L        | 1dBi      | 4dBi    |
| Laird Connectivity | MHF4L Jumper               | CARSMF10AMH4L-001              | N/A          | SMA to MHF4L |           |         |

### 16.3 FCC

#### Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**Important Note:****Radiation Exposure Statement**

The product complies with the US portable RF exposure limit set forth for an uncontrolled environment and is safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

Country Code selection feature to be disabled for products marketed to the US/CANADA.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

**Integration Instructions for Host Product Manufacturers****Applicable FCC rules to module:**

FCC Part 15.247

**Summarize the specific operational use conditions:**

This device is intended only for OEM integrators under the following condition:

- The transmitter module may not be co-located with any other transmitter or antenna

As long as condition above is met, further transmitter test will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

---

**IMPORTANT NOTE:** In the event that these conditions cannot be met (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization. The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

---

The end user manual shall include all required regulatory information/warning as show in this manual.

**Limited module procedures**

Not applicable

**Trace antenna designs**

Not applicable

**RF exposure considerations**

Co-located issue shall be met as mentioned in *Summarize the specific operational use conditions*.

Product manufacturer shall provide the following text in the end-product manual:

**FCC Radiation Exposure Statement**

*The product complies with the US portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.*

A 20-centimeter separation distance and co-located issue shall be met as mentioned in *Summarize the specific operational use conditions*.

Product manufacturer shall provide the following text in the end-product manual:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

### Label and Compliance Information

Product manufacturers must provide, with the finished product, a physical or e-label that states the following:

Contains FCC ID: SQG-LWB5PLUS

### Information on Test Modes and Additional Testing Requirements

Test tool: wl tool shall be used to set the module to transmit continuously.

### Additional Testing, Part 15 Subpart B Disclaimer

The module is only FCC authorized for the specific rule parts listed on the grant, and that the host product manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. The final host product still requires Part 15 Subpart B compliance testing with the modular transmitter installed

## 16.4 ISED Canada

*This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:*

- (1) *This device may not cause interference*
- (2) *This device must accept any interference, including interference that may cause undesired operation of the device*

*L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :*

- (1) *L'appareil ne doit pas produire de brouillage;*
- (2) *L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.*

*This radio transmitter (IC: 3147A-LWB5PLUS) has been approved by Innovation, Science and Economic Development Canada to operate with the antenna types listed below, with the maximum permissible gain indicated. Antenna types not included in this list that have a gain greater than the maximum gain indicated for any type listed are strictly prohibited for use with this device.*

*Le présent émetteur radio (IC: 3147A-LWB5PLUS) a été approuvé par Innovation, Sciences et Développement économique Canada pour fonctionner avec les types d'antenne énumérés ci dessous et ayant un gain admissible maximal. Les types d'antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué pour tout type figurant sur la liste, sont strictement interdits pour l'exploitation de l'émetteur.*

### Radiation Exposure Statement:

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

### Déclaration d'exposition aux radiations:

Cet équipement est conforme Canada limites d'exposition aux radiations dans un environnement non contrôlé. Cet équipement doit être installé et utilisé à distance minimum de 20cm entre le radiateur et votre corps.

This device is intended only for OEM integrators under the following conditions:

- 1) The transmitter module may not be co-located with any other transmitter or antenna.

As long as the condition above is met, further transmitter testing is not required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

Cet appareil est conçu uniquement pour les intégrateurs OEM dans les conditions suivantes:

- 1) Le module émetteur peut ne pas être coimplanté avec un autre émetteur ou antenne.

Tant que les 1 condition ci-dessus sont remplies, des essais supplémentaires sur l'émetteur ne seront pas nécessaires. Toutefois, l'intégrateur OEM est toujours responsable des essais sur son produit final pour toutes exigences de conformité supplémentaires requis pour ce module installé.

---

**IMPORTANT NOTE:** In the event that these conditions cannot be met (for example certain laptop configurations or co-location with another transmitter), then the Canada authorization is no longer considered valid and the IC ID cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate Canada authorization.

---

**NOTE IMPORTANTE:** Dans le cas où ces conditions ne peuvent être satisfaites (par exemple pour certaines configurations d'ordinateur portable ou de certaines co-localisation avec un autre émetteur), l'autorisation du Canada n'est plus considéré comme valide et l'ID IC ne peut pas être utilisé sur le produit final. Dans ces circonstances, l'intégrateur OEM sera chargé de réévaluer le produit final (y compris l'émetteur) et l'obtention d'une autorisation distincte au Canada.

---

### **End Product Labeling**

The final end product must be labeled in a visible area with the following: "Contains IC: 3147A-LWB5PLUS."

### **Plaque signalétique du produit final**

Le produit final doit être étiqueté dans un endroit visible avec l'inscription suivante: "Contient des IC: 3147A-LWB5PLUS."

### **Manual Information to the End User**

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

### **Manuel d'information à l'utilisateur final**

L'intégrateur OEM doit être conscient de ne pas fournir des informations à l'utilisateur final quant à la façon d'installer ou de supprimer ce module RF dans le manuel de l'utilisateur du produit final qui intègre ce module.

Le manuel de l'utilisateur final doit inclure toutes les informations réglementaires requises et avertissements comme indiqué dans ce manuel

## 16.5 Japan (MIC) Regulatory

The Sterling LWB5+ is approved for use in the Japanese market. The part numbers listed below hold WW type certification. Refer to **ARIB-STD-T66** for further guidance on OEM's responsibilities.

| Model     | Certificate Number | Antenna         |
|-----------|--------------------|-----------------|
| 453-00045 |                    | Chip Antenna    |
| 453-00046 |                    | MHF4L Connector |
| 453-00047 | 201-200402         | Trace Pin       |
| 453-00048 |                    | MHF4L Connector |
| 453-00049 |                    | MHF4L Connector |

### *Labeling Requirements*

It is recommended that the host device bears a label showing the Japanese "GITEKI" mark and the certification number accompanied by the following statement:

当該機器には電波法に基づく、技術基準適合証明等を受けた特定無線設備を装着している

Translation: *This equipment contains specified radio equipment that has been certified to the Technical Regulation Conformity Certification under the Radio Law.*

## 16.6 Australia and New Zealand Regulatory

RCM: Pending Compliant to standards EN 300 328 V1.9.1, AS/NZS 4268: 2012-A1:2013, and EN 55022:2010/AC:2011  
If this device is used in a product, the OEM has responsibility to verify compliance of the final end product to the Australia/New Zealand (RCM) Standards. All end-products require their own certification (SDoc). You will not be able to leverage the module certification and ship product into the country.

## 16.7 European Union

The integrator must include specific information in the user's guide for the device into which the Sterling-LWB5+ is integrated. In addition to the required FCC and IC statements outlined above, the following Radio Equipment Directive (RED) statements must be added in their entirety and without modification into a prominent place in the user's guide for the device into which the LWB5+ is integrated:

This device complies with the essential requirements of the 2014/53/EU – Radio Equipment Directive (RED). The following test methods have been applied in order to prove presumption of conformity with the essential requirements of the 2014/53/EU – Radio Equipment Directive (RED):

- **EN 62368-1:2014/A11:2017**

Safety requirements for audio/video, information, and technology equipment

- **EN 300 328 v2.2.2 (2019-07)**

Electromagnetic compatibility and Radio Spectrum Matters (ERM); Wideband Transmission systems; Data transmission equipment operating in the 2,4 GHz ISM band and using spread spectrum modulation techniques; Harmonized EN covering essential requirements under article 3.2 of the R&TTE Directive

- **EN 62311:2008 | EN 50665:2017 | EN 50385:2017**

RF exposure

- **EN 301 489-1 v2.2.0 (2017-03)**

Electromagnetic compatibility and Radio Spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements

- **EN 301 489-17 V3.2.4 (2020-09)**

Electromagnetic compatibility and Radio spectrum Matters (ERM); ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 17: Specific conditions for 2,4 GHz wideband transmission systems and 5 GHz high performance RLAN equipment

- **EN 301 893 V2.1.1 (2017-05)**

Electromagnetic compatibility and Radio spectrum Matters (ERM); Broadband Radio Access Networks (BRAN); Specific conditions for 5 GHz high performance RLAN equipment

- **EU 2015/863 (RoHS 3)**

Declaration of Compliance – EU Directive 2015/863; Reduction of Hazardous Substances (RoHS)

This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries, except in France and Italy where restrictive use applies.

In Italy the end-user should apply for a license at the national spectrum authorities in order to obtain authorization to use the device for setting up outdoor radio links and/or for supplying public access to telecommunications and/or network services.

This device may not be used for setting up outdoor radio links in France and in some areas the RF output power may be limited to 10 mW EIRP in the frequency range of 2454 – 2483.5 MHz. For detailed information the end-user should contact the national spectrum authority in France.

## 16.7.1 EU Declarations of Conformity

This device complies with the essential requirements of the Radio Equipment directive: 2014/53/EU. The following test methods have been applied to prove presumption of conformity with the essential requirements of the Radio Equipment directive **2014/53/EU**:

|                            |  |
|----------------------------|--|
| <b>Manufacturer</b>        | Laird Connectivity   |
| <b>Products</b>            | 453-00045, 453-00046, 453-00047, 453-00048,<br>453-00049     |
| <b>Product Description</b> | Sterling-LWB5+ 802.11a/b/g/n/ac Module with Bluetooth<br>5.0 |
| <b>EU Directives</b>       | 2014/53/EU – Radio Equipment Directive (RED)                 |

Reference standards used for presumption of conformity:

| Article Number | Requirement   | Reference standard(s)   |
|----------------|---|---|
| 3.1a           | Low voltage equipment safety  | EN 62368-1:2014/A11:2017  |
|                | RF Exposure   | EN 62311:2008<br>EN 50665:2017<br>EN 50385:2017                                 |
| 3.1b           | Protection requirements with respect to electromagnetic compatibility | EN 301 489-1 v2.2.3 (2019-11)<br>EN 301 489-17 v3.2.4 (2019-12)                 |
| 3.2            | Means of the efficient use of the radio frequency spectrum            | EN 300 328 v2.2.2 (2019-07)<br>EN 301 893 v2.1.1 (2017-05)<br>EN 300 440 v2.1.1 |

### Declaration:

We, Laird Connectivity, declare under our sole responsibility that the essential radio test suites have been carried out and that the above product to which this declaration relates is in conformity with all the applicable essential requirements of Article 3 of the EU Radio Equipment Directive 2014/53/EU, when used for its intended purpose.

The minimum distance between the user and/or any bystander and the radiating structure of the transmitter is 20 cm.

## 17 ORDERING INFORMATION

| Part Number  | Description  |
|--------------|--|
| 453-00045R   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 - Integrated Antenna (Tape and Reel)     |
| 453-00046R   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – MHF4 (Tape and Reel)                   |
| 453-00047R   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – Trace Pin (Tape and Reel)              |
| 453-00045C   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – Integrated Antenna (Cut Tape)          |
| 453-00046C   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – MHF4 (Cut Tape)                        |
| 453-00047C   | 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – Trace Pin (Cut Tape)                   |
| 453-00045-K1 | Development Kit for 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 - Integrated Antenna |
| 453-00046-K1 | Development Kit for 1x1 802.11 a/b/g/n/ac + Bluetooth 5.0 – MHF4               |

### 17.1 General Comments

This is a preliminary datasheet. Please check with Laird Connectivity for the latest information before commencing a design. If in doubt, ask.

## 18 BLUETOOTH SIG QUALIFICATION

### 18.1 Overview

The LWB5+ Series module is listed on the Bluetooth SIG website as a qualified Controller Subsystem.

| Design Name    | Owner              | Declaration ID | Link to listing on the SIG website  |
|----------------|--------------------|----------------|---|
| Sterling LWB5+ | Laird Connectivity | D050382        | <a href="https://launchstudio.bluetooth.com/ListingDetails/119009">https://launchstudio.bluetooth.com/ListingDetails/119009</a> |

It is a mandatory requirement of the Bluetooth Special Interest Group (SIG) that every product implementing Bluetooth technology has a Declaration ID. Every Bluetooth design is required to go through the qualification process, even when referencing a Bluetooth Design that already has its own Declaration ID. The Qualification Process requires each company to register as a member of the Bluetooth SIG – [www.bluetooth.org](http://www.bluetooth.org)

The following is a link to the Bluetooth Registration page: <https://www.bluetooth.org/login/register/>

For each Bluetooth Design, it is necessary to purchase a Declaration ID. This can be done before starting the new qualification, either through invoicing or credit card payment. The fees for the Declaration ID will depend on your membership status, please refer to the following webpage:

<https://www.bluetooth.org/en-us/test-qualification/qualification-overview/fees>

For a detailed procedure of how to obtain a new Declaration ID for your design, please refer to the following SIG document, (login is required to views this document):

[https://www.bluetooth.org/DocMan/handlers/DownloadDoc.ashx?doc\\_id=283698&vld=317486](https://www.bluetooth.org/DocMan/handlers/DownloadDoc.ashx?doc_id=283698&vld=317486)

## 18.2 Qualification Steps When Referencing a Laird Connectivity Controller Subsystem Design

To qualify your product when referencing a Laird Connectivity Controller Subsystem design, follow these steps:

1. To start a listing, go to: [https://www.bluetooth.org/tpg/QLI\\_SDoc.cfm](https://www.bluetooth.org/tpg/QLI_SDoc.cfm)

---

**Note:** A user name and password are required to access this site.

2. In step 1, select the option, New Listing and Reference a Qualified Design.
3. Enter D050382 in the Controller Subsystem table entry.
4. Enter your complimentary Host Subsystem and optional Profile Subsystem QDID in the table entry.
5. Select your pre-paid Declaration ID from the drop-down menu or go to the Purchase Declaration ID page.

---

**Note:** Unless the Declaration ID is pre-paid or purchased with a credit card, you cannot proceed until the SIG invoice is paid.

6. Once all the relevant sections of step 1 are finished, complete steps 2, 3, and 4 as described in the help document accessible from the site.

Your new design will be listed on the SIG website and you can print your Certificate and DoC.

For further information please refer to the following training material:

<https://www.bluetooth.org/en-us/test-qualification/qualification-overview/listing-process-updates>

If you require assistance with the qualification process please contact our recommended Bluetooth Qualification Expert (BQE), Steve Flooks, [steve.flooks@eurexuk.com](mailto:steve.flooks@eurexuk.com).
