August 07, 2018

PCN_080718

Dear Sir/Madam:

Subject: Notification of Change to LT3579, LT3579-1 Die

Please be advised that Analog Devices has made a minor change to the LT3579 and LT3579-1 die to improve manufacturing robustness. This change allows for better control of the Quiescent Current (not switching) distribution over temperature.

This die change has been qualified by performing extensive engineering evaluation across a broad range of application conditions and test characterization over the full operating junction temperature range. No other functional or parametric specifications are affected, and the datasheet is unchanged. Production shipments of product incorporating the revised die will begin no sooner than October 07, 2018. The list of affected part numbers is shown on the attached page.

Please provide an expeditious approval to this PCN, so that ADI can start to ship the new device. Should you have any questions or concerns please contact your local Analog Devices sales representatives or you may contact me at 408-432-1900 ext. 2077, or by e-mail at JASON.HU@ANALOG.COM. If we do not hear from you by October 07, 2018, we will consider this change to be approved by your company.

Sincerely,

Jason Hu
Quality Assurance Engineer

For questions on this PCN, please contact Jason Hu or you may send an email to your regional contacts below or contact your local ADI sales representatives.
