Product Drawing

CUSTOMER'S PRODUCT NAME:

TDK PRODUCT NAME: DC/AC INVERTER UNIT CXA- P1212E-WJL

TENTATIVE

*Notice

Product Drawing is not contract. This is only technical data.

This technical data may change internal description without any notice.

When you design final product please request us specification through our sales or distributors. After you receive the specification, the contract is effective on signature of the specification.

TDK-Lambda Corporation

Precautionary Notes Regarding the Use of This Inverter

When using this product, give due consideration to the precautionary notes described below and ensure a safe design. Inappropriate use may result in electric shock, injury or fire.

	ign. Inappropriate use may result	i in electric shock, inju	i y or tire.	
	🕂 Warning		<u>A</u>	
•This product is subject to high v Failing to do so may result in el	voltage. Do not touch it while the po ectric shock.	ower is on.		
	▲ Caution			
Do not use it with any other load Store this product under the com Do not store this product in an e This product is subject to high we provide a proper warning indicat This product is designed for use If it is to be used with medical ed transportation equipment to whic Consult us before using if this pr Avoid using this product under h dust, dirt or any corrosive gas (s Also,be careful not to allow the f If the product does not have a b it is recommended that a fuse be smoke or fire in the event of a m Even when the product has a bu the circuit may not function prop It is recommended that an appro be provided separately from the Use the product only within the s and operating temperature rang Provide a measure for the prever Abnormal voltage may result in To prevent problems from occur appropriate measures to prevent This product is not designed to p In order to protect the inverter fr the inverter. 			-				

Note1-1. Marking of TDK part No, Date code, Country of origin.

3) Country of origin code example. (ex. MADE IN JAPAN. MADE IN CHINA. MADEIN MALAYSIA).

- Note1-2. For circuit connection, please prefer to test circuit diagram [4].
- Note1-3. Please use minimum of 3mm clearance (all directions) between inverter high voltage area and any conductors. Please refer to mechanical drawing for marking of high voltage area.
- Note1-4. Open voltage (strike voltage) is measured across the transformer secondary winding at no load as the reading at the output connector would be less than the actual value.
- Note1-5. If the start up voltage falls below Cold Cathode Tube strike voltage, the CCFL will not light up easily specially at lower ambient temperature. Please review mounting instruction to avoid any abnormal operation due to coupling/leakage capacitance of inverter high voltage area to any surrounding conductor.

- Note1-6. Please check your lamp characteristic for minimum operational current and set the limit point in your design to avoid flickering and/or abnormal operation.
- Note1-7. For proper operation of circuit protection (fuse or IC PROTECTOR), Please use minimum of 4.0A capacity for input power supply.
- Note1-8. Impedence from the wire connection can cause a ripple in the input. The product has an internal fuse of 2.0A. Please check that input current peak wave form does not exceed 2.0A.

Item	Symbol	Specification	Unit	Notes
	Vin	0~15		
Input Voltage	Vrmt	0~Vin	V	
	Vbr	0~16		
Load Resistance	RL1//CL1 RL2//CL2	100//5	kΩ//pF
